STATEMENT

my work is about making images.....most of which come about by experimentation.....as paint is pushed around shapes appear and discovery, change, and invention begin.....images are suggested and developed.....things are added.....things are taken away.....many of these paintings are enigmatic.....viewers can “read” into them what they want..... i am very eclectic and work in different “styles”.....from realism to non-objective abstraction.....and a combination of the two in one painting.....i also do three dimensional work.....shaping and painting wood into wall hangings and free standing objects.....so it is what it is...

BIO

schooled in architecture & visual arts.....Pratt Institute
